

# Polyform® Purse Seine Floats

Proudly made by  
The Originator of  
Modern Plastic Buoys

## POLYFORM® OF NORWAY

The BPB 3500 Bacell™ Purse seine Floats are manufactured from ethylene vinyl acetate (EVA) to our in-house developed raw material recipe. Advanced production technology guarantees floats of superior quality. The grommets are a part of the products from stage one in the production cycle and thus form an integrated part of the finished products. BACELL™ floats are light in weight, have very high tensile strength and do not absorb any water. The outstanding elasticity of the Bacell® material provides floats that have the highest resistance to shrinkage, permanent deformation and breakage.

## Product information

Article number	BPB3500
Diameter	176 mm
Length	202 mm
Centre hole diameter	35 mm
Weight (nominal)	510 g
Buoyancy	3 500 g

## Technical information

Material	EVA
Hardness surface, shore A	40
Hardness foam core, shore A	30
Compression strength @10% strain speed 10 mm/min	210 kPa
Recommended min temp.	-25°C
Recommended max temp.	40°C
Temp. not to be exceeded	50°C
Density (g/l.)	130

## Polyform AS

Polyform AS is a world leading manufacturer of buoys fenders and floats, and the originator of the modern inflatable plastic buoy. The company is registered in Norway and situated in Ålesund at the north-western coast of Norway, and benefits from being located in one of the world's most innovative maritime environments.

The product range of Polyform AS consists of:

- Inflatable buoys and fenders made from soft Vinyl plastics.

- Purse Seine Floats, buoys and marina fenders made from BACELL closed cell foam.

- Hard-shell buoys and pontoon floats made from PE and filled with foam
